

GENERAL CONDITIONS OF PROCUREMENT

1. PARTIES.

Supplier (natural person or legal entity indicated at the top of the Order), and Enagás S.A. (or any of its Subsidiaries) (hereinafter "Enagás").

2. CONTRACTUAL REGIME.

The Order is governed by the terms and conditions set out in the Order and in the General Conditions.

These General Conditions will apply in full to the Order, except where they are expressly derogated from or modified in the Order.

In the event of any discrepancy between the General Conditions and the Order, the provisions of the latter will apply.

To be effective, any modification of the General Conditions or the Order must be formalised in writing and signed by the Supplier and Enagás.

Any exception to these General Conditions proposed by the Supplier will only be valid if it has been previously formulated in writing and accepted in the same form by Enagás, and will only be applicable to the Order for which it has been proposed, and under no circumstances may it be extended to current or subsequent contracts with the Supplier.

3. ENTRY INTO FORCE.

Once signed by Enagás, the period of validity of the Order will be extended until the supply is completed, including the guarantee period. For the issue and payment of invoices, the Order will come into force and take effect upon receipt by Enagás of the duplicate copy of the Order, accepted and signed by the Supplier.

4. PRICES AND EXTRAS.

The total amount of the Order is as stated in the Order and, unless otherwise stated in the Order, does not include VAT.

The prices included in the Order will be final, unless otherwise stated in the Order. Price increases or revisions to the prices indicated in the Order will not be accepted, unless they are contemplated in the Order.

Increases in services over and above those indicated in the Order will not be accepted unless they are contemplated in the Order or expressly authorised in writing by Enagás by means of a document signed by both Parties.

The Supplier will be responsible for any difference between the amount tendered and the actual cost incurred for the provision of the services.

5. DELIVERY OF MATERIALS.

a) Date and Place of Delivery:

Delivery of materials will be made within the established deadlines and dates and at the delivery points detailed in the Order, accompanied by a triplicate of the delivery note, signed and stamped, or failing this, at Enagás S.A., Paseo de los Olmos 19, 28005 Madrid.

Two working days prior to the date set for delivery of the goods, the Supplier will inform Enagás of this circumstance in order to specify the time of delivery.

In the event of non-compliance with this requirement, Enagás will make its best efforts to accept the goods upon receipt. If this is not possible, it may reject them and negotiate a new delivery date and time with the Supplier, without prejudice to Enagás' right to demand the penalties set out in point b) below.

Any modification of the date or point of delivery by Enagás will be communicated in writing with due notice to the Supplier, who will also make its best efforts to adapt to the new delivery circumstances, and may, if deemed impossible, agree with Enagás on a reasonable delivery alternative.

Extraordinary costs and expenses incurred by the Parties as a result of a change in the date and place of delivery will be borne by the Party causing or requesting such a change.

If the materials are sent to Enagás before the stipulated delivery date, they will be stored at the Supplier's expense, unless the delivery is made at Enagás' request.

b) Penalties for Failure to Comply with the Delivery Date:

Whenever the Supplier does not comply with the delivery deadline set out in the Order, and the delay is not attributable to Force Majeure or Fortuitous Event, as these are defined in the General Conditions, the Supplier will pay Enagás a cumulative penalty for each week of delay or part thereof, for the following amounts:

- For the first week of delay or part thereof: 0.5% of the total price of the Order.
- For the second week of delay or part thereof: 1.5 % of the total price of the Order.
- For the third week of delay or part thereof: 3% of the total price of the Order.
- For the fourth week of delay or part thereof and subsequent weeks: 5% of the total price of the Order, for each of these.
-

The penalties for delay cannot exceed, overall, 10% of the amount of the Order.

Once a cumulative penalty for delay totalling 10% of the total amount of the Order has been reached, Enagás may terminate the Order pursuant to the provisions set out in these General Conditions.

c) Delivery Costs:

Transport and delivery costs will be borne by the Supplier, except as provided for in foregoing section a), in relation to any extra costs that may arise from the modification of the delivery conditions, which will be borne by the Party originating or requesting such modification.

d) Identification of the Materials:

In the delivery of materials, the Supplier will identify, on all packages and bundles, the order number, number of pieces, the name of Enagás and the expiry date, if any.

All delivery notes, certifications and attached documentation must include the Order number and the corresponding position in relation to the same, as well as the description and code of the material used by Enagás, which also appears in the Order.

e) Imported Materials:

Enagás will indicate in each order the commercial terms considered (INCOTERMS, 2000).

Delivery of these types of merchandise and capital goods will be made, preferably, for any type of shipment, under the following condition: DDP condition up to the place of destination.

f) Equipment:

The Equipment Suppliers will issue a valued certificate with the equipment delivered, which, once signed and stamped, will be sent to Enagás, to the address and person indicated in the Order, for final acceptance.

6. QUALITY AND RECEPTION OF MATERIALS.

The Supplier must deliver the materials in perfect condition and according to the technical specifications indicated in the Order and must also attach the manufacturing and quality certificates, which may be applicable, together with all the documentation requested in the Order.

For the purposes of the provisions of this General Condition, "receipt of materials" is understood to be the moment when Enagás returns to the Supplier the delivery note or certification duly certified by an authorised person.

Without prejudice to the rights recognised to Enagás in General Condition 18, in the event of quantity or quality defects in the materials/equipment delivered, Enagás may choose between placing the defective materials at the disposal of the Supplier for a period of ten (10) days, so that it may proceed to replace or repair them, or proceed to terminate the Order for non-fulfilment, with the effects established in General Condition 13.

In the former case, if the Supplier has not replaced or repaired the materials within ten days, Enagás will have the option:

- Not to accept, terminating the Order, in whole or in part, and returning the defective materials to the Supplier, being compensated by compensating the Supplier for the damages caused, and with the loading and transport costs to be borne by the latter.
- To accept the defective materials with the consequent proportional reduction of the price.

7. BILLING AND PAYMENT.

All invoices must be issued in compliance with current tax and commercial requirements.

Invoices issued for orders to which these General Conditions apply must include the following codes:

Order No. / company (Enagás company indicated on the order):

Certification No.: (72000xxxxxx that Enagás has previously had to provide to the Supplier).

Invoices must be issued with the same concepts or items indicated in the Order, without which they will be returned to the Supplier.

Invoices must be sent, to be managed on the Easyap platform, by one of the two alternative means, at the Supplier's discretion, indicated below (these addresses are exclusively for receiving invoices):

- Hard copy to Apartado de correos 3590 (PO Box).

- o Electronic format (facturae 3.2.1 or higher) or PDF (version 1.3 or higher unprotected and with a resolution of 300Dpls or higher). In this case they will be sent to the following email address facturasconpedido.enagas@easyap.com

If invoices are sent in PDF format, they must meet the following requirements:

- o Include only one file per invoice and never more than one invoice per PDF. In each email you can attach as many invoices and attachments as you want, but must always have different names. This means that the name of one PDF cannot be the root of another. For example, you cannot call one PDF 'invoice' and another 'invoice01' in the same email. The recommendation would be "I01.pdf", "I02.pdf", "I03.pdf", etc.
- o If you wish to send attachments to the invoice, this must be done in an additional file and never together with the invoice. The file name of the attachment file must be the same as that of the invoice, followed by "_attachment". For e.g. "invoice.pdf" and "invoice_attachment.pdf", for the invoice and attachment file respectively.
- o If you are going to send several invoices in the same email they can be sent in a compressed .zip file (.rar is not supported).

You can check the status of your invoices by registering at <https://provedoresenagas.easyap.com>

The date of the invoice may never be prior to the delivery date or the date of the storage order of the material and its corresponding documentation.

Invoices will not be accepted if their prices and discounts do not match those set out in the Order, except in those cases in which, as a consequence of a review accepted by both Parties, or subsequent agreement, different prices and conditions are applicable.

Payment of invoices issued by the Supplier, in accordance with the provisions of the foregoing conditions and the Order, will be made on the day after 60 days have elapsed from the acceptance of the material, under the terms established in article 4 of Law 3/2004, of 29 December, which establishes measures to combat late payment in commercial transactions; and will be managed by "reverse factoring/transfer" by a bank of Enagás' choice. If, in accordance with the foregoing, the day on which payment is due to be made is a public holiday, payment will be made on the next working day.

The handover of the guarantees required in the Order from the Supplier to Enagás is an essential requirement for acceptance of the invoices.

Generically, for orders for amounts between 5,000 and 100,000 euros, Enagás will retain 10% of each invoice submitted by the Supplier as a guarantee on the amount to be paid in each invoice. The withholding of 10% of each invoice submitted by the Supplier will be returned at the end of the guarantee period referred to in General Condition 18.

The amounts paid will be considered, for all purposes, as payments on account of the final settlement, which will be made once all the Services subject to this Order have been completed, without their payment prejudging the compliance of the same with the provisions of this Order.

8. DOCUMENTATION.

At the time of delivery of the materials, or, failing this, at such time as the Parties may agree, the Supplier will send Enagás the technical documentation required in the Order, free of charge.

Specifically, drawings, test protocols, lists of parts, operating manuals, instruction books, lists of recommended spare parts with their prices and all documents and obligations which have been requested with the Order.

The Supplier shall also send the invoices, dispatch notices and delivery documentation in the manner and with the number of copies established for in these General Conditions.

In the case of imported materials, the Supplier will send, to the address and person indicated in the Order, the following documentation:

- Transport document: Onboard Bill of Lading, Air Waybill, Rail Consignment Note or Land Bill of Lading.
- Insurance document.
- Other documents: Commercial Invoice, Certificates of Origin and Packing List.

The Order will not be considered completed until all the documentation required in accordance with these General Conditions and the Order itself has been received by Enagás. Delays in the delivery of the requested documentation will entitle Enagás to withhold payments to the Supplier until such documentation is received.

The Parties undertake, for a minimum of six (6) years from the date of receipt of the materials and documentation, to keep in their custody the original documents such as quality certificates, authorisations, final plans, x-rays, testing and trial reports, among others, as well as any other document deemed appropriate from the point of view of inspection and quality control, and also undertake to provide each other with the necessary copies for the same period of time.

9. INSPECTION AT SOURCE.

The Supplier hereby undertakes to comply with all of the technical and quality requirements set out in the Order, including those established with regard to the notice period to carry out the inspection of materials and equipment during their manufacturing process.

In this regard, the Supplier hereby undertakes to cover all costs related to the need to perform supplementary or repetitive inspections caused by delays or failure to provide the required prior notice periods, including the expenses corresponding to the time dedicated to the inspection performed by Enagás or its representative.

Moreover, the Supplier hereby undertakes to present the materials and equipment that comply with all of the requirements set out in the purchase order for inspection. When any material or equipment is considered unacceptable in the final tests or verifications, the Supplier will be liable for all costs related to the inspection performed by Enagás or its representative.

Additionally, Enagás or its representative will be entitled to demand any examination, verification, inspection or test, for the purpose of confirming the required quality. If the results are satisfactory, Enagás will pay the corresponding expenses. If this is not the case, in other words if the material or equipment does not satisfy the established requirements, the Supplier shall cover all of the costs, including the inspection costs, and will provide all of the means required to carry out the repairs, amendments or replacement of materials required to satisfy the required quality.

10. ASSIGNMENT.

Enagás and its Group companies may convey, on a singular basis and through any act in the law, its position in this Order to any other company that forms part of the ENAGÁS Group. Likewise, ENAGÁS and the companies of its Group may convey their contractual position as a consequence of any universal transfer (including, but not limited to, those arising from mergers, split, segregation and global transfer of assets and liabilities), whether such universal transfer is voluntary, or as a consequence of the application of electricity or gas sector regulations on the legal separation of activities. Enagás or its Group company will communicate, as soon as possible, the effective date of the transfer and the identification data of the new Party to this Contract.

The Supplier cannot assign or transfer the benefits, rights, interests, obligations and contractual position stemming from the Order in full or in part without prior written consent from Enagás. Breach of this obligation by the Supplier will be sufficient cause for the termination of the Order.

The assignee will in any event assume in full all rights and obligations arising from this Order, whether before or after the time at which the assignment becomes effective.

11. SUBCONTRACTING.

The Supplier may not subcontract all or part of the Order without the prior written approval of Enagás. Failure to comply with this obligation will entitle Enagás to terminate the Order.

No contractual and/or labour relationship whatsoever will arise between Enagás and the subcontractors of the Supplier as a consequence of the execution of the Order.

Enagás reserves the right to request the substitution of those subcontractors that, prior to the commencement or during the progress of the Order, it is not reasonably appropriate to maintain. The Supplier may ask Enagás to give reasons for requesting replacement of the subcontractor.

The subcontracting will not exonerate the Supplier from any of its contractual responsibilities or obligations. The Supplier will also be fully liable with Enagás for the acts, faults and negligence of any of its subcontractors, or of their agents and workers.

Enagás will not be liable to any subcontractor or any personnel of the subcontractors with regard to any claim.

The Supplier shall hold Enagás harmless from any claims that subcontractors may lodge with regard to this Order, compensating Enagás for any cost or payment which, where appropriate, it is obliged to make as a consequence of said claims, including the legal defence and procedural representation.

In the event of a claim by any subcontractor, Enagás will be entitled to withhold the amount claimed by them from the invoices pending payment to the Supplier.

12. INTELLECTUAL AND INDUSTRIAL PROPERTY.

The Supplier guarantees Enagás that it holds the intellectual property rights to the products it offers, either directly or indirectly through the corresponding agreements with its suppliers. In any case, the Supplier will be responsible for obtaining the necessary assignments, permits and authorisations from the holders of the corresponding patents, models and trademarks, as well as for obtaining the necessary licences or intellectual property rights, and will be responsible for the payment of the rights and compensation derived from such concepts.

The Supplier will at all times protect Enagás from any liability for infringements related to rights arising from patents, trade secrets, copyrights, trademarks, trade names or similar rights and, in ultimately, from any liability for infringements related to industrial or intellectual property rights that the Supplier may incur. The Supplier undertakes to do whatever is necessary to indemnify Enagás and its personnel against any claims or lawsuits that may be brought against Enagás and/or its employees for such infringements and to indemnify the latter for all damages, expenses and costs (including consultancy, legal and lawyers' fees) that it may incur as a result of such claims or lawsuits or for the actions in which it is required to intervene.

For the purposes of the foregoing, the Supplier undertakes to notify Enagás, in an irrefutable manner and immediately upon receipt, of any claim, judicial or out-of-court, addressed to it and filed by third parties with respect to the industrial or intellectual property rights that are the object of the Order.

In any event, if Enagás is sued by a third party for breach by the Supplier of the obligations referred to in this clause, the Supplier, at the request of Enagás and within ten (10) calendar days, will be obliged to present a financial guarantee for a minimum of ten percent (10%) of the total amount of the Order and its revisions, extensions and administrative work, if any, to cover the amount of the claim received.

Enagás will own all documents, designs, plans, computer programs and specifications, as well as their analogue versions and any copies thereof that Enagás may deliver to the Supplier for the execution of the work, as well as any inventions, patents, utility models and other industrial property rights generated or that may be generated on the basis of any documentation that Enagás may deliver to the Supplier for the execution of the work. The Supplier must use them exclusively for the execution of the Order and will return them on completion of the same, maintaining at all times the appropriate precautions for the processing, handling and transmission of the information, guaranteeing security and confidentiality, in accordance with the provisions of these General Conditions and the legislation in force applicable to each Order.

Designs, documents, plans, computer programs and specifications, as well as the analogue versions and copies thereof, owned by the Supplier before the start of the Services, are and will remain the property of the Supplier, and the Company will not have any right over or interest in them except for the receipt of the Services. Likewise, the Supplier owns the designs, documents, plans, computer programs and specifications, as well as the analogue versions and copies thereof, generated where appropriate using its own documentation and technology in the execution of the Works, as well as inventions, patents, utility models and other industrial or intellectual property rights. However, the designs, documents, plans and computer programs (including their methodology, processes, technologies, hardware, licences or algorithms), as well as

their analogue versions and copies thereof, which have been delivered by the Supplier in compliance with the Order, will become the property of Enagás.

In any case, the intellectual or industrial property rights and the technology and methodology resulting from the works or services carried out by the Supplier in compliance with the Order, as well as the registrations to which any of these give rise, will correspond to Enagás, without this conferring any right on the Supplier to increase the price set in the Order for said work or service.

Furthermore, neither of the parties may use the registered trademarks or trade names of the other party in public communications without their explicit formal approval.

13. ORDER TERMINATION.

The Order may be terminated on any of the following grounds:

- a) At the request of either Party, in the event of a major breach by the other Party, in full or in part, of the obligations set out in the Order when, having been requested by the Party not in breach to redress the Breach, wherever possible, this has not taken place within a deadline of 10 calendar days.

For the purposes of this Condition, the accumulation by the Supplier of a late payment penalty equal to or greater than 10% of the total amount of the Order, as well as the non-renewal of the guarantees upon their maturity in case of need, as indicated in General Condition 15, will be considered non-fulfilment.

- b) At the request of Enagás, without the need to identify just cause, provided that the Supplier is notified one month in advance.

In the cases of termination set out above, the following effects shall take place:

In case a), the Party in breach will be obliged to compensate the other party for the damages and losses caused as a result of the breach, including extra costs caused by breach of the Order.

In case b), Enagás will pay the Supplier all amounts pending payment and, following an agreement between the Parties to this end, will settle any costs which it had incurred prior to notification of the termination and which were directly attributable to the Order.

Furthermore, in cases a) and b), when the Supplier receives notification of early termination of the Order, it will discontinue all related services and will provide all means within its power to cancel any outstanding orders and subcontracts, under terms that are satisfactory for Enagás, and limiting itself from that time to performing the services required to safeguard and protect the services in progress and everything related thereto.

Likewise, for the purposes of this General Condition, the other causes for termination of the Order will be considered to be those contained in these General Conditions and those provided for in the legislation in force.

14. LIABILITY.

The Supplier will be liable to Enagás for any damages that the Supplier itself and the persons for which it is legally or contractually responsible, may cause to Enagás or its employees, resulting from an action or omission by the Supplier in the fulfilment of its obligations or by any of the aforementioned persons, involving any kind of negligence, fault or fraud.

The Supplier's aggregate total liability to Enagás arising from a given Order, in relation to all guarantees and indemnities for damage to Enagás' property, may not exceed, except in the case of wilful misconduct or gross negligence or any other type of liability that cannot be excluded or limited by law, 100% of the amount of the Order or the amount required as a minimum limit of indemnity agreed by the Parties for the Order, in the event that such amount is greater. Exceptions to this limit are engineering redesign, compensation for damages to third parties, and penalties for delays in complying with the Order.

In the event of contributory negligence, or the involvement of a third party in causing damages, liabilities will be determined proportionately, based on the degree of involvement of the Parties.

Liability for indirect, consequential damages and harm caused by one Party to the other is excluded (in particular, losses of production, operation and profits are excluded, and, in general, losses or damages of an indirect nature that each Party may have suffered).

The Supplier will be liable for and will hold Enagás harmless from any third party claims against Enagás for damages caused to said third parties resulting from an action or omission in the fulfilment of its obligations by the Supplier or by any of the persons mentioned, involving any kind of negligence, fault or fraud. For these purposes, third parties will be understood to refer not only to legal and physical persons not parties to this Order, but also to the employees of Enagás, and the Supplier must be liable for any damages that may be caused to them. The same liability may be demanded of Enagás by the Supplier, except for claims for death or accident of the Supplier's employees or its dependent personnel, in which cases the Supplier will be liable, and Enagás will be held harmless and exempt in relation to such claims.

The Supplier's liability will not be limited as a consequence of documents or information provided by Enagás for the performance of the object of the Order, unless this information conditions or is the basis for the performance of said order.

The Supplier will be liable to third parties, and Enagás will be exempt from all claims for death or accident of its employees or its dependent personnel, as well as those raised by third parties arising or resulting from accidents, actions or omissions by the Supplier due to non-compliance with the obligations of the guarantee period included in General Condition 18.

In the event of termination of the Order due to non-fulfilment by the Supplier, the latter will indemnify Enagás for the extra costs incurred by the latter for new supplies. To cover this compensation, Enagás may take possession of the amounts withheld or, where appropriate, execute the performance bond, as established in General Condition 15 below.

15. GUARANTEES AND WITHHOLDINGS.

For those orders in excess of 100,000 euros or for those orders for which this is expressly stipulated in the Order, upon signing the Order and prior to the commencement of the services, the Supplier will provide Enagás with a bank guarantee, as a performance bond for compliance with the obligations and responsibilities arising from the Order, for a value of 10% of the price and in accordance with the template attached in Appendix 3 of these General Conditions. The guarantee obligation by means of a guarantee for said value will remain in force in favour of Enagás during the entire guarantee period established in General Condition 18 to cover damages and expenses that may arise from defects in the supplies made; and the guarantee will be returned at the end of said period if these defects do not exist.

If the duration of the order is increased during its execution, the Supplier will be obliged to maintain in force the guarantee already provided to Enagás when the Order was signed, with the same requirements as those set out above.

The guarantee and performance bond shall be issued until the date on which the guarantee period is deemed to end. In the event that the guarantee period ends after the date indicated in the guarantee, the Supplier will be obliged to extend the validity of the guarantee (or to provide a new guarantee) until the new estimated end date of the guarantee period indicated by Enagás. Failure to extend the validity of the guarantee (or failure to provide a new guarantee) will be considered a breach of the Order.

Both the performance bond (where applicable) and the withholdings carried out may be used to refund the amounts accrued, for compensation for delays, as well as any liability that the Supplier and/or its subcontractors could incur as a consequence of any breach of the obligations assumed pursuant to this Order.

The bank guarantees indicated in these General Conditions must be issued (i) by a Bank of recognised prestige with a commercial branch in Spain and a credit rating of at least BBB by Standard & Poor's or equivalent by Moody's or Fitch, and (ii) with the validity, scope and amount determined in the templates attached to the General Conditions and in the Order. Enagás reserves the right to request the replacement of the guarantees if the Bank's credit rating is downgraded during the formalisation or execution of the Order. The Supplier will bear the costs arising from the guarantees.

An essential requirement for the payment of invoices will be the delivery by the Supplier to Enagás of the

guarantees required by the latter in accordance with these General Conditions or in accordance with the Order. In the case of a hard-copy guarantee, please send it to the following postal address:

ENAGÁS
Paseo de los Olmos,19
28005.Madrid
FAO: Jhoanna Kalilá Aldana Jiménez
Digital Finance Services Center Management

If the endorsement is with a digital certificate, send it to the following email address jkaldana@enagas.es.

16. NO EMPLOYMENT RELATIONSHIP.

For the purposes of the Order, under no circumstances will the employees, agents or personnel reporting to the Supplier or its Subcontractors be considered related to Enagás.

17. INSURANCE.

The Supplier will take out and maintain in force, at its own expense, for sufficient sums assured and for the duration of the Order, the following Insurance Policies:

- a) **Social Security and Life and/or Accident Insurance** for all employees assigned to the work, pursuant to the Law.
- b) **Civil Liability Insurance** to cover third party claims for material or personal damages and their consequential damages, caused while fulfilling the obligations set forth in the Order.

This Policy must include the following:

- 1) The indemnity limit shall have a minimum coverage of €500,000 and may be increased, on objective grounds, in the Conditions of the Order.
- 2) In addition, the insurance shall include the guarantees of Civil Liability arising from Accidental Pollution of the Environment when expressly stipulated in the Order and Civil Liability for Defective Products, exclusively in those works that involve the supply of materials and equipment.

These Policies will act as "Primary Policies" and always in the first instance before any others that may be applicable. The Insurance policies indicated must be taken out with Insurance Companies of recognised solvency and prestige.

Notwithstanding the foregoing, the Supplier may, at its own expense, take out any supplementary insurance policies deemed appropriate for full coverage of its liabilities under the Order.

Prior to the commencement of supplies, the Supplier shall send Enagás a certificate of each of the insurance policies indicated in the preceding paragraphs, which will be incorporated as Appendix 4, except where this General Insurance Condition is not applicable to the Order. This certificate must be renewed annually prior to its expiration, with an undertaking to extend the range of cover, if deemed necessary by Enagás. Failure to comply with this obligation will be considered substantial for the grounds of termination of the Order.

The Supplier is obliged to inform Enagás in writing of any incident during the validity of the Order affecting the validity and conditions of the insurance policies taken out.

Enagás may at any time ask the Supplier to provide the originals of the Policies, or certified copies, of the insurance cover it has taken out, as well as any receipts or proof that the payments of the corresponding premiums are up to date.

In the event of a loss event, any difference that arises in payment of the compensation, whether through the application of an excess policy or for any other reason, with regard to the insurance policies taken out, will be payable by the Supplier.

All insurance policies taken out in compliance with this General Condition must include an express mention of exoneration of Enagás' liability, with an express waiver of the right of recourse and subrogation against Enagás by the insurers of said policies.

The Supplier, under its sole responsibility, will require its subcontractors to take out the necessary insurance policies. This will not exonerate the Supplier from its liability to Enagás.

The insurance certificate must be sent to the following email address DF.SEGUROS@enagas.es.

18. WARRANTY PERIOD.

The Supplier guarantees Enagás that its material:

- a) Is free from defects in workmanship, materials or manufacture.
- b) Conforms to the specifications, drawings, samples or other established descriptions applicable to it.
- c) Is fit for purpose.
- d) Is new and high quality.
- e) Is free of liens and encumbrances in favour of third parties not declared or known to Enagás.

In any case it guarantees that the material of its design is free from defects in design, materials and workmanship for a period of twelve (12) months of continuous operation and a maximum of eighteen (18) months from its accepted receipt at the point of delivery. A new warranty period equivalent to the previous one shall be applicable to those materials that have been subject to repair or replacement as a consequence of the provisions of this General Condition.

In the event that, there are defects or if the material supplied is out of specification, the Supplier fails to comply with its obligation to repair or replace such materials as established in these General Conditions, Enagás may repair or replace such materials at its own expense, charging the Supplier for the costs incurred.

In the event of the existence of liens and encumbrances in favour of third parties, payments of the outstanding amounts will be withheld and will be paid at the time when full ownership and possession is declared in favour of Enagás. This is without prejudice to Enagás' right to be compensated for the expenses, damages and losses that this may have caused it, and to enforce, where appropriate, the performance bond established in General Condition 15.

19. STORAGE OF MATERIALS.

The Supplier, at Enagás' request, must keep the material and/or equipment of the Order stored in its warehouses for a maximum of six months from the delivery date thereof.

In this case, Enagás shall pay the costs that the Supplier may incur as a result of the storage, unless the same has already been required in the Order or appeared therein as an obligation of the Supplier.

The storage shall be carried out in such a way that the materials and/or equipment are kept in perfect condition and duly identified as the property of Enagás, with the Supplier acquiring the condition of

custodian, with all its inherent rights and obligations.

In this case, the invoice will be accompanied by a storage certificate, issued by the Supplier in accordance with the template included in Appendix 6 of these General Conditions.

Enagás may, at any given time, withdraw all or part of the materials and/or equipment stored at the Supplier's facilities.

The Supplier will cooperate fully in the removal. It may not retain the materials or equipment for any reason whatsoever, except for non-payment of the storage costs, nor may it carry out acts that prevent or hinder removal by Enagás, except in cases of Force Majeure, as defined in these General Conditions.

If, even in the event of Force Majeure, the removal of the materials and/or equipment can be carried out, Enagás shall provide, whenever possible, the necessary people to do so, with the collaboration of the Supplier.

In the event of non-compliance with the provisions of this General Condition, the Supplier will be obliged to indemnify Enagás for all damages and losses caused, and existing withholdings and guarantees provided by the Supplier to Enagás may be used for this purpose.

Enagás shall notify the Supplier, in writing, of the date and location where the stored material must be sent. The Supplier must complete the aforementioned document, and include three copies of the delivery note or certification issued at the time, as appropriate, with the material or equipment.

Enagás, through its authorised representatives, will sign these copies, which will serve as proof that the material or equipment has been received by Enagás. Two of the copies shall be for Enagás and the third for the Supplier.

20. PACKAGING.

All materials and/or equipment shall be packaged by the Supplier in a manner that allows for safe handling, transport and storage. Containers shall be of a strength commensurate with the size, type and weight of the items contained therein and will be adequately secured to prevent slippage while in transit.

Suitable and adequate protection of the contents will be achieved with weather resistant materials, using corrosion preventive materials where necessary, protection against extreme temperatures and protection against theft and mishandling.

Efforts will be made to reduce the volume of packaging as much as possible. Any parts which so permit and which are not rigidly attached to a main piece of equipment may be packed separately, taking care to mark them clearly for easy identification. In the machinery, corrosive parts must be protected with suitable substances before packaging. Due protection will also be given to

instruments, precision tools, spare parts and electric motors, among others, which need to be kept in humidity-free conditions.

Fragile items to be lifted will be held on supports that allow them to be handled by guides and hoists and suspension points will be clearly identified.

All pipes and fittings shall be marked in a perfectly legible manner, indicating on all visible parts the company name of Enagás and the order number

21. TAXES.

All taxes and fees shall be charged to the Party to which they correspond pursuant to current legislation. When

the Supplier is a foreign company, it must provide the certificate of tax residence, for the purposes of the application of the relevant double taxation avoidance treaty

22. OWNERSHIP TITLE AND TRANSFER OF RISKS.

The ownership title and the risk of material loss will be transferred to Enagás upon acceptance of the materials by Enagás at the delivery point established in General Condition 5, except in the event of storage.

23. NONDISCLOSURE AND DATA PROTECTION.

I. NONDISCLOSURE:

For the purposes of the Order, Confidential Information will mean all information delivered, sent, received or exchanged, identified as such, in particular, plans, drawings, designs and specifications, except as expressly authorised for disclosure in writing by each Party.

Confidential Information may not be disclosed to third parties or used for purposes other than those for which the Order is made during the term of the Order and for an additional five years after its termination, except as provided in this General Condition.

The content of the Order may not be publicly disclosed by either Party without the prior written consent of the other Party.

Confidential Information will not include any information:

- that was in the public domain at the time of disclosure.
- which, following disclosure, is published or otherwise enters the public domain, without breach by the Party receiving such information.
- that, at the time of disclosure, the Party receiving such information was already in possession of it.
- which, following disclosure, was received from a third party who has a legal right to disclose such information; or
- that was independently developed by the receiving Party without reference to the Supplier's Confidential Information.

In addition, either Party may disclose Confidential Information of the other Party if required to do so by law or by court order.

In the event of any disclosure or loss of Confidential Information, the receiving Party will promptly notify the supplying Party.

Any type of information, verbal or written, that Enagás may provide to the Supplier will be understood to be the exclusive property of ENAGÁS. The Supplier undertakes to use said information exclusively within the scope of the provision of the contracted services and for the sole purpose of complying with them as agreed, and will consequently be liable for any damages that may arise for Enagás as a result of non-compliance with the foregoing.

Upon completion of the Order, the Supplier undertakes to delete from its files and remove from its facilities all information belonging to or provided by Enagás, and not to disclose it itself or through third parties. Enagás will also have the right to carry out on-site verification that the above actions have been carried out by the Supplier.

II. PERSONAL DATA PROTECTION:

a) Rendering of services without access to personal data

The rendering of services under this order does not directly involve the processing of personal data.

Notwithstanding the foregoing, the Supplier's staff may have access to places where files containing this type of information are processed, or they may have access to media or resources containing personal data or other documentation of a confidential nature belonging to ENAGÁS.

In this regard, the SUPPLIER is expressly prohibited from accessing the personal data owned by ENAGÁS. The SUPPLIER undertakes to inform its staff of this prohibition and to observe due professional secrecy and confidentiality in respect of personal and / or confidential information unrelated to the provision of the service, accessed accidentally.

b) Duty of mutual information between the signatories to the order

Pursuant to Organic Law 3/2018 on the Protection of Personal Data and Regulation (EU) 2016/679 of the European Parliament and the Council of 27 April 2016, the legal representatives of the parties to the order are informed that their identifying or contact data included in this order or data provided by virtue of the contractual relationship, will be included in two processing records, whose purpose is the management of the contractual relationship to perform the contracted service, this being the lawful basis that legitimizes the

parties to process their personal data.

The data collected are those essential for the establishment and development of the contractual relationship, and the data shall not be transferred to third parties, unless there is a legal obligation and the party owning the data shall always be informed in advance. However, in the event that a service has to be performed by a third party, only third parties legally or contractually linked to the parties may access their personal data for the provision of auxiliary services required for the normal running of the service.

Each of the parties will retain the personal data of the representatives of the other party for the term of this order, once the order is terminated, the data will be duly locked but kept available to judges and courts, the Public Prosecutor or the competent Authorities, for the fulfilment of processing obligations for their period of limitation (generally speaking, six years for accounting documents and up to ten years for tax matters).

The personal data of the representatives will not be subject to international transfers. Otherwise, the parties shall inform the other party in advance and must comply with the adequacy guarantees necessary under European Data Protection Regulation.

Likewise, they undertake to adopt the technical and organisational measures necessary to avoid loss, misuse, alteration, unauthorised access and theft in order to guarantee the security of the personal data provided.

The legal representatives of both parties may exercise their rights of access, rectification, objection, erasure, data portability and restriction on data processing against the other party, when applicable, by written communication to the address for the purposes of notifications indicated in the header of this Order or by email: protecciondedatos@enagas.es in the case of ENAGÁS and to the address indicated by the SUPPLIER in the order. In all cases, this communication must include, among other aspects, the name and surname of the requesting party, as well as the petition on which the request is based, the address for the purposes of notifications and the date, signature and a photocopy of the National Identity Document or Passport of the requesting party.

The Parties undertake reciprocally to report in writing any modification to their data that may occur.

If the parties believe their data are not being processed correctly, they may send their complaints to the data protection body, which, in Spain, is the Spanish Data Protection Agency (www.aepd.es).

24. FORCE MAJEURE.

Neither Party shall be responsible for the breach of its contractual obligations as a consequence of Force Majeure or a Fortuitous Event, as defined in the Civil Code. Any instances of Force Majeure or a Fortuitous Event will be communicated to the other Party no later than 48 hours after its existence has become apparent.

Each Party will carry out their best endeavours (providing this is within their capabilities) to avoid or mitigate the effects of a situation of Force Majeure or a Fortuitous Event, as well as to ensure the normal continuation of the Order.

In these cases, the deadlines for compliance with the obligations stipulated shall be extended for a period that is equivalent to the time lost as a consequence of Force Majeure or a Fortuitous Event.

If the situation of Force Majeure or a Fortuitous Event that affects all of the obligations of one of the Parties with regard to this Order, or a major part of its obligations, lasts uninterruptedly for more than two months, the Party not affected by this situation of Force Majeure or a Fortuitous Event may terminate this Order by giving fifteen (15) calendar days' notice. Where appropriate, the termination shall not exonerate the Party from compliance with the obligations that arose prior to the situation of Force Majeure or the Fortuitous Event.

25. APPLICABLE LAW AND JURISDICTION.

The law applicable to the Order will be Spanish law.

The Parties hereby undertake to comply with the Order in good faith, using negotiations and amicable agreements to resolve any differences that may arise between them with regard to the application, development, compliance, interpretation and performance of the same.

The Parties expressly submit to the jurisdiction and terms of reference of the Courts of Madrid for ruling on any dispute or litigation concerning the Order, in particular with regard to its interpretation, performance or non-performance, whether before or after its expiry, and which in the opinion of one of the Parties they are unable to resolve through mutual agreement.

The submission of conflicts between the Parties to the foregoing judicial bodies does not entitle either Party to suspend compliance with their obligations under the Order.

26. QUALITY ASSURANCE AND ENVIRONMENTAL REQUIREMENTS.

ENAGÁS may require the Supplier to have a properly documented quality assurance programme, devised based on UNE-EN-ISO 9001 guidelines, and it must be applied to the subject matter of the Order. In addition, if necessary, it may require the development of a specific Quality Plan for the order, in accordance with ISO 10005 "Quality Management. Guidelines for Quality Plans".

This Contract will be governed by the applicable environmental legislation in force, both state, regional and local, as well as the internal regulations of ENAGÁS in this respect defined in its environmental management system and the commitments acquired by the supplier within the framework of its activity.

Where applicable, the supplier must comply with the environmental and energy efficiency requirements for contractors and suppliers of ENAGÁS specified in Appendix 5 Environmental Protection.

27. SUSTAINABILITY.

The supplier guarantees and acknowledges the importance of adhering to ethical and sustainability obligations and principles in the conduct of their business.

Without prejudice to the regulatory and legal provisions applicable to each of the Parties, in all matters relating to the development and execution of this Agreement, the Supplier guarantees that all directors, managers and employees will act in accordance with the principles laid down in the ENAGÁS Group Code of Ethics (published on the following link on the ENAGÁS website), http://www.enagas.es/enagas/es/Sostenibilidad/Codigo_etico_y_politicas, or others that the supplier has established as its own, provided they are equivalent to those set out in the ENAGÁS Code of Ethics.

Furthermore, during enforceability of the Agreement, the Supplier undertakes to allow ENAGÁS to audit the level of compliance with these requirements, and accepts any possible corrective or preventive measures that may be introduced.

28. NON-EXCLUSIVITY.

ENAGÁS will not be bound vis-à-vis the Supplier by any exclusivity agreement with respect to the services covered by these General Conditions or with respect to possible additional supplies, of any nature, that it may be interested in contracting.

Signed in witness whereof, dated _____ of ____ of _____.

BY ENAGÁS

APPENDICES:

- 1. HEALTH AND SAFETY, ENVIRONMENT AND QUALITY ASSURANCE POLICY**
- 2. CBA PROCEDURE: SACE Instructions.**
- 3. PERFORMANCE BOND TEMPLATE.**
- 4. INSURANCE CERTIFICATE TEMPLATE.**
- 5. ENVIRONMENTAL PROTECTION.**
- 6. MATERIALS STORAGE CERTIFICATE TEMPLATE.**

APPENDIX 1: HEALTH AND SAFETY, ENVIRONMENT AND QUALITY ASSURANCE POLICY

The Supplier declares it is aware of and accepts compliance with the Health & Safety, Environment and Quality Policy, published in the following link on the ENAGÁS website:

<https://enagas.es/stfls/ENAGAS/Documentos/Políticas/Política%20de%20seguridad%20y%20salud,%20medio%20ambiente%20y%20calidad.pdf>

APPENDIX 2: CBA PROCEDURE: SACE INSTRUCTIONS

Enagás is committed to complying with and enforcing compliance with the established regulatory framework for occupational

health and safety, involving not only its own professionals but also the contractors it works with.

SACE is a tool which is already internationally consolidated and implemented in the petrochemical industry, where it has been well accepted.

Through the implementation of SACE, Enagás seeks to guarantee the availability of all procedures, ensuring that all processes are of high quality and that there is smooth and continuous communication between companies operating in the gas sector, in order to uphold the highest levels of safety.

The aim is to instil a common health and safety culture at all contractor companies and at all levels of contracting. Enagás requires that all professionals take on board its health and safety policy and apply it in their daily operations. Safety should be second nature, both for Enagás and its supplier companies.

Therefore, in order for your proposal to be considered in this process, you are required to apply for registration on the Enagás Contractor Accreditation Service (SACE) by submitting the initial health and safety documentation requested for the Coordination of Business Activities procedure (Spanish Royal Decree 171/2004). The certificate issued by SACE, with a PASS qualification, must be attached to the Technical Bid documentation.

Presentation of the SACE certificate with a PASS is a specific requirement if your company is to be awarded the contract for the required service. Failure to present this SACE certificate will result in the exclusion of your proposal/bid from the process.

The platform for registration is:

<http://www.enagas.es/enagas/es/Proveedores/CoordinacionActividadesEmpresariales>

At the start of the registration process, SACE, as the Coordination of Business Activities manager, will require an additional payment, valid for one year (VAT not included):

- €70 for a large company
- €60 for an SME
- €40 for a micro-enterprise
- €20 for the self-employed (1 person)

If you are awarded the contract under this process, your company must maintain the PASS qualification for the duration of the bid/contract as a contractor. This will require regular updating of the information and documentation submitted to SACE. The annual cost (excluding VAT) of this platform for companies awarded contracts is as follows, minus the amount paid in advance (as indicated above):

- €208 for a large company
- €167 for an SME
- €109 for a micro-enterprise
- €66 for the self-employed (1 person)

As you know, contractor companies must submit a set of required documents in order to work with Enagás. SACE is intended to speed up this process: the necessary documents can be uploaded onto the platform for validation and a pass will be issued in return.

The pass is a card that must be presented by workers to access all Enagás facilities. Its authenticity can be verified by SACE or by a QR code. The annual cost of the pass is €45 per person, valid for two years.

You can use SACE to consult your documentation and your position in the company health and safety ranking, among other operations.

In compliance with Article 10.2 of RD 171/2004, contractors are responsible for any necessary subcontracting and for passing on the information regarding risks, preventive and emergency measures, and instructions issued by Enagás. Likewise, contractors are responsible for asking subcontractors to register on the SACE platform.

APPENDIX 3: PERFORMANCE BOND TEMPLATE

THE BANK _____, represented by _____, who is aware of the Contract _____ (specify), executed by and between Enagás, S.A. (hereinafter "Enagás") and _____ (contractor)

HEREBY GUARANTEES

Irrevocably, in a joint and several, abstract manner, with express waiver to the guarantor's right to be liable only for his proportionate share of the debt ("beneficio de división"), to have all remedies first exhausted against the principal debtor ("beneficio de orden"), and to compel the creditor to sue the principal first ("beneficio de excusión"), being enforceable on first demand by Enagás, to _____ (Secured Company) up to a limit of _____ (Amount), as a definitive bond and assurance of performance of the obligations under the aforementioned Contract and, therefore, including the present and future liabilities arising therefrom.

The Bank will pay and enforce this guarantee up to its maximum and prefixed amount of _____ (Amount), on simple demand by Enagás, without such payment prejudging the resolution of disputes that may arise between Enagás, S.A. and _____ (guaranteed Company).

This guarantee will be fully valid until Enagás authorises its cancellation by registered letter to the Bank _____ returning this document, or until XX-XX-XX, the date on which it is estimated that the Guarantee Period of the aforementioned Contract will have ended, whichever occurs earlier.

The signatories to this Guarantee are duly authorised to represent and bind the entity that is underwriting, as stated in the power of attorney attested to by the notary public _____ on [ddmmyyyy] under Record No. _____.

This guarantee has been registered on today's date in the special guarantee register under number _____.

Signature and stamp

APPENDIX 4: INSURANCE CERTIFICATE TEMPLATE

[Name], on behalf of and in representation of (*Name of the Insurance Company*), by virtue of the powers conferred through a public deed authorised in the presence of the Notary Public of [place], [name of Notary Public], on [ddmmyyyy], under record number.....

HEREBY CERTIFIES:

That the Company (*Name of the Supplier*), has taken out an insurance policy with this Insurance Company (if there are several Insurance Companies, provide a reference to each of them and their percentage of stake in the insurance) to cover General Liability through Contract/Policy No., which from zero hundred hours on [ddmmyyyy] until midnight on [ddmmyyyy] covers the Civil Liability (*appropriate cover: General, Professional, Business*) of (*Supplier's name*), in the performance of its activities, and more specifically to perform the Order under reference, corresponding to (*description of the purpose of the Order*), and with a limit under no circumstances less than (*minimum amount of liability that must be insured. Check Order*)euros.

*(NB: *Include the next paragraph only when Enagás provides technical personnel to comply with the purpose of the Order*).

The status of Additional Insured Parties, within the limits, terms and conditions set out in the policy, is held by Enagás, as well as its personnel, contractors and subcontractors, for their participation in (*Description of the purpose of the Order*).

The Insurance Company hereby waives its right to demand restitution against these parties or against their Insurance Companies, and shall not exercise any judicial actions that may be admissible, whenever they hold civil liability as a consequence of the activity carried out by..... (*Supplier's name*), and for the acts that are the object of cover through the aforementioned Policy.

Duly placed on record in [place], [ddmmyyyy].

APPENDIX 5: ENVIRONMENTAL PROTECTION

ENVIRONMENTAL AND ENERGY EFFICIENCY REQUIREMENTS FOR ENAGÁS CONTRACTORS AND SUPPLIERS

Compliance with current environmental legislation

Companies contracted to carry out works or refurbishments of various kinds undertake to comply with current environmental legislation when carrying out their activities within the work areas or when handling equipment, materials, products and waste.

With respect to the supply of products and services, the supplier undertakes to comply with the environmental laws in force regarding the use of hazardous or prohibited substances, packaging and labelling, transport conditions, noise and odour emissions during the operation of the equipment and any other environmental regulations established in the laws in force.

When supplying chemical products, the supplier will provide the safety data sheets for the products concerned by the order, which will contain the information described in the applicable legislation.

Use of materials, products, facilities and services

Will only use, at Enagás' facilities or service provision sites, the quantities of hazardous products that are strictly necessary for the performance of activities.

Will appropriately transport any material, product or equipment that is necessary for the development of the activity to the areas where it is to be used, taking responsibility for its temporary storage in the agreed places and for its safekeeping.

Will identify all hazardous product packaging in terms of its hazardousness, in accordance with the applicable legislation.

Will adopt the appropriate measures when handling chemical products, such as oils, greases, paints, solvents, etc., to prevent them from being discharged both on the ground and into the different water networks or public watercourses.

Will have the safety data sheets of the hazardous products used in the execution of the services, and provide the ENAGÁS representative with a copy of these.

Shall remove and manage all packaging, product residue or impregnated material it owns that is used in the performance of activities in accordance with applicable legislation.

As far as possible, the consumption of water, energy and other related raw materials will be rationalised.

Will maintain the equipment used in the works in a correct state to avoid noise and nuisance to the environment or uncontrolled emissions.

Spills

In the event of spillage, the following procedure will be enacted, with constant adherence to the instructions given in the safety sheets for the spilt products:

Immediate Action

- Stop the spillage from continuing to occur.
- Use physical means to contain the spilt product.
- In the case of liquids, prevent the spillage from affecting the water networks of the facility or site by directing it towards protective ground cover and without drains or drainage channels.
- If the spill affects the discharge networks, action will be taken with the means available to minimise the effects on the receiving environment and the ENAGÁS representative will be notified immediately.

Subsequent Action

- Do not wash the spillage with water.
- Collect the contained product in watertight containers appropriate for the characteristics of the spilt product.
- In the case of liquids, absorb residual liquid with sand, sepiolite or other inert absorbent, or mop up and dispose of in suitable containers.
- Identify the container with respect to the product it contains and manage it as hazardous waste in accordance with current legislation.

Waste management

ENAGÁS facilities and work areas will not accumulate waste in an uncontrolled manner, especially that which may pose a risk to the environment; to this end, the contracted companies will separate and deposit the waste generated by their activities and prevent these from mixing with each other.

Hazardous waste will be deposited separately in appropriately marked containers suitable for the waste in question.

Inert waste from construction and renovation works will be deposited in a separate area for subsequent management.

Separate collection systems are established for waste that can be reused or recycled whenever possible.

The waste will be suitably stored and labelled until the contracted company removes it in accordance with the legislation in force and the execution programme of the works, and it will have to prove to the ENAGÁS representative that these steps have been taken.

In the event of waste materials supplied by ENAGÁS, these will be dealt with in accordance with the ENAGÁS Environmental Procedure "Waste Management", for which instructions should be sought from the ENAGÁS representative.

Maintenance of air conditioning systems

The companies contracted to carry out these activities must provide their accreditation as authorised maintenance companies.

Maintenance work is carried out in accordance with the provisions of the Regulation on Thermal Installations in Buildings, ensuring that no substances are released into the atmosphere and that the products replaced are recovered for recycling or destruction.

Environmental controls

The companies entrusted through contracts with the control of the environmental parameters shall attach the relevant calibration certificate to the results report. The submission of this certificate is not required as long as the contracted company is accredited by ENAC to perform the controls that are the subject of the service and the report reflects the uncertainty of the result obtained.

- **Atmosphere**

The companies contracted to carry out regulatory inspections of combustion sources must record the results in an inspection report containing all the data required by the applicable legislation and enter the results of the inspections in the relevant records or IT equivalent.

These reports will reflect the conclusions regarding compliance with the legal limits.

- **Noise**

The companies contracted to determine noise emission levels in the vicinity of ENAGÁS facilities will record the results in an inspection report containing the following:

- Description of the methodology used for the measurements, in accordance with the criteria established in the Municipal Ordinance or the corresponding regional regulations. If these regulations do not exist, the company shall use its own methodology.
- Indication of the existing legal limit values. If no legal reference exists, the report will reflect this fact.
- Assessment of background noise levels and methodology used.
- Identification of the area where the installation is located and corresponding diagram showing the measurement points.
- If there are legal limits, conclusions on their compliance.

- **Discharges**

Companies that carry out discharge controls shall report the results obtained, comparing each parameter either with the limit values laid down in the relevant discharge authorisation or, in the absence thereof, with the limit values laid down in the applicable legislation. These reports will reflect the conclusions regarding compliance with the legal limits.

Energy efficiency

As far as possible, contracted companies will contribute at all times to the efficient use of available energy sources, to improve competitiveness and reduce greenhouse gas emissions and other related environmental impacts.

They also undertake to comply with current legislation on energy use and consumption and energy efficiency.

Nuisance activities

No nuisance emissions in excess of the legally permissible emission levels for air quality and the water environment will be generated during the performance of work or the provision of services. Similarly, no noise shall be generated that is considered to be a nuisance because it exceeds the applicable legal requirements and no offensive odours shall be generated.

Hazardous activities

Before carrying out any activity involving actual or potential combustion or chemical reaction, or before temporarily storing flammable or corrosive products, the corresponding authorisation must be obtained from ENAGÁS' representative.

All signs and regulations existing at the centre regarding fire prevention, the conduct of the use of energy, the use of machinery, areas where smoking is prohibited or works where there is a risk of fire must be observed.

Emergency situations

In the event of an environmental emergency, employees of the contracted company will act in accordance with the existing regulations and instructions at the ENAGÁS centre.

In any case, and prior to commencing the execution of the works, the contracted company will consult with the ENAGÁS representative on any doubts regarding these conditions and courses of action.

In addition, contractors and suppliers will at all times seek to apply best practice in environmental and energy efficiency management and identify opportunities for continuous performance improvements within their business activities.

Mr _____, holder of national ID document number _____, _____ by profession, in his capacity as _____ of the company _____, with powers of attorney given in a deed authorised in the presence of the Notary Public _____ under his/her record number _____ and which remains in force.

HEREBY CERTIFIES

That the materials detailed hereunder have been requested by Enagás, S.A. (or any of its subsidiaries) in Order No. _____, that these materials belong to this party and are on deposit at our warehouses, whereby said company may remove them whenever it deems such action opportune, at no additional cost whatsoever.

That it shall provide its full collaboration and under no circumstances will it retain or perform acts that prevent or hamper the withdrawal by Enagás, S.A., except in cases of force majeure. For the purposes of this certificate, force majeure shall be considered to be those general strikes that are not exclusively those of the Supplier, but which are general, sectoral or local strikes not caused by personnel of the Supplier, in a claim against this party or on grounds of their employment, economic or legal situation. In the event that the consequences of force majeure do not physically or otherwise prevent the removal of materials and/or equipment, Enagás, S.A. may provide the persons required to this end, whenever possible. For these purposes, the material means and collaboration of the company shall be used.

In the event of breach of our obligation to hand over material except in cases of force majeure, as defined previously, this Company shall be obliged to compensate Enagás, S.A. (or any of its subsidiaries) for all damages and losses occasioned, and to this end may use the withholdings that exist and any guarantees surrendered by this Company to Enagás, S.A. (or any of its subsidiaries).
